DETAILED ACTION

Drawings

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: parental community filter means, profile creation means, a dynamic search engine, a dynamic filter, central location and a flagging filter.
3. Pages 1 and 2 of the specification reference a Provisional Patent Application. The Application No. is missing. Appropriate correction is required.
4. Page 5 of the specification discloses an illustration that should be on a separate sheet in a drawing section of the application (see 37 CFR 1.71(f) and 37 CFR 1.58).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. App. Pub. US 2002/0049806 A1 to Gatz et al.

As concerns claim 1, a parental community filter means to permit qualified parents to join a parental community (abstract, lines 1-4); profile creation means (abstract, lines 3-4) to describe each qualified parent; a hierarchical infrastructure (abstract, lines 6-7) for initially screening parents to create a varying degrees of accessibility to data; a dynamic search engine (figure 9) to permit those members of the parental community to search the data initially controlled by a central location to permit monitoring and filtering of the data transmitted and structuring of the infrastructure and a flagging filter component (0014) to scan messages and data prior to delivery.
